MARK HAMILL

TEXAS WHEELERS DOWN THE TUBE!

There are a few of the new television programs that have been cancelled already, and "Texas Wheelers" was one of the first to go!

Everyone was really surprised when ABC-TV cancelled "The Texas Wheelers." Especially Mark Hamill, the young co-star who played the part of Doobie Wheeler. "I really couldn't believe it," he sighed. "The show was rated as one of the best for the new season and with Mary Tyler Moore's Company producing it we thought for sure we had a hit!" Mark isn't the only one upset with the cancellation! Even the network is disappointed. They thought the show had great potential and though the ratings have been low, they plan on giving the program another chance in January. That will give them some time to re-write, re-shoot and maybe discover what went wrong! So, hopefully, we can all watch for the return of the Wheeler family on the tube in January! •
