Knight-Ridder Newspapers

**Q** I'm a great fan of David Cassidy. What can you tell me about what he's done lately. Is he still recording? I can't find his albums in stores. — D.V., Chicago.

Cassidy, now 40, is on the comeback trail with a new album, "David Cassidy" which has been doing well since its late fall release. Check your record store. Cassidy dropped out of the limelight in 1978, tired of his "teen idol" image. He did some theater work. He got back into recording by accident when he was joking with several Los Angeles disc jockeys and played the tapes of several songs he was working on. Album offers resulted.
