Hi there!

Boy oh boy, this office has just been full of letters from fans who have just loved David's Christmas release. I think that "Brown Eyes" is just about one of my favourite records. Of course, we've really got Bell Records to thank for the release of that magnificent maxi single. I think it was especially good as a gift for friends who hadn't heard some of David's earlier things. If you felt the same way, and managed to give that maxi single as a gift to someone, then I reckon there must be quite a few more Cassidy fan-atics around then there were before Christmas!

It was quite awhile since I'd listened to any of the songs on that maxi, and I really was surprised to discover that I did still like them. It's really the mark of a great performer when he goes through all the changes that David has and still manages to entertain all his fans with both kinds of music.

But then, I guess you could say that David certainly is a great entertainer—and if you don't, I'll thump you!! Now, on to new business. I think that we should start by setting things right in this office. We've got quite a few postal orders here which are missing either names, addresses or both!

The following postal orders have been banked, but I haven't sent the souvenir programmes, as the addresses are incomplete
