

TOMORROW'S GIANT STARS

You've seen their faces quite a lot recently, and you've been asking questions about them. So here they are . . . DAVID CASSIDY, DONNY OSMOND and FRANK WEBB . . . the giant stars of tomorrow and

YOU selected them!

They're three beautiful, talented and groovy guys and just so you can get to know them personally, here's 33 things that turn them ON and OFF!

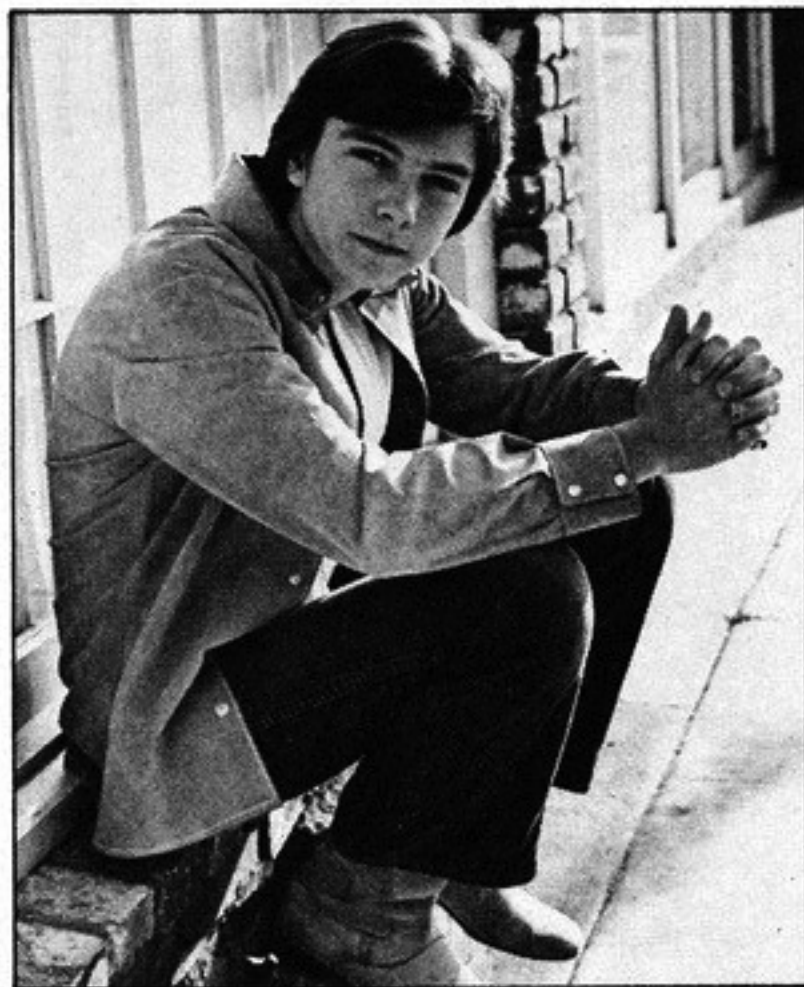

All About David

DAVID CASSIDY is the guy you've been seeing on most of the popular television series during the past year. He's been on "Medical Center," "The Mod Squad," and "Marcus Welby" and come September you'll be seeing him each

week on ABC TV's newest show, "The Partridge Family."

David knows exactly what turns him *ON* and *OFF* and now you can know too!

ON — Girls that somehow always manage to stay happy even when things are looking blue!

OFF — Telephones that ring at all hours of the day and night especially when I'm trying to sleep!

ON — Animals, animals, and more animals! I love them.

OFF — Dirty, greasy, or oily hair, short or long whether it's on boys or girls.

ON — Spending the entire day at an amusement park just goofing around and having lots of fun!

OFF — Too much of any discotheque. I like to dance but there are many better places to do it!

ON — The colors black, white, blue and brown.

OFF — Anybody who is impressed with me because I'm in show business and not just because they like me as a person!

ON — Dry roasted cashew nuts at any time of the day or night. I can eat a whole case of them at one sitting!
