

# David Teaches You How To Kiss!

WHAT'S THE MOST EXCITING THING you ever dreamed could happen to you?

## The Touch Of His Lips!

No matter *what* the most scrumptious, luscious and divine thing you've ever tasted in your whole life is, it can't ever possibly compare to the sweet and sensational thrill of the touch of David Cassidy's lips on *yours*!! So that you (and you alone) will know what mysterious magic is in store for you on that wonderful day when your dream of David's kiss does come true, here are four easy David kissing lessons from David so you can be prepared for the most exciting event of your entire young life!

### When

Although you can never be sure exactly *when* David will kiss you for the very first time—it might be after your third date on your doorstep; it might be on your very first meeting when he looks directly into your eyes, shakes your hand and then suddenly leans forward and kisses you gently on the forehead; or it might be after a scary movie when you shudder, recalling the most frightening part and David takes your face in his hands saying, "Don't be afraid. It's just a movie" and kisses you softly on the cheek—but for *sure* David will kiss you on the spur of the moment! David is just as impulsive about kissing a girl as he is about all other aspects of his life, so no matter *when* he kisses you, it won't be because he planned it—it will be something he just felt like doing right that minute!

### Where

David, like all romantics, doesn't confine himself to simply giving you a token kiss-to-symbolize-the-end-of-the-evening on the lips. You might call David a creative kisser, since he's apt to kiss your eyelid, your nose, your fingertips or the back of your hand (maybe even your elbow!). So, if you happen to be walking down the street holding hands and David suddenly gets the urge, he'll lift your hand to his lips and kiss your fingertips. Or, maybe in the middle of an ice cream soda he might lean across the table and softly kiss you on the cheek.

### How

Because David is so impulsive and doesn't have a precise pattern to his kissing, *how* he'll kiss you is just as likely to depend on his mood as *when* and *where* he'll kiss you! Most often, David will be very gentle when he kisses you, but he's not above taking a playful nibble at your fingertips or giving you a soft bite on your ear lobe! But, David can (and does) sometimes take kissing very seriously, and it's then he'd be most likely to kiss you on the lips with his mouth slightly open pressing against yours. After a kiss of this type, David will, no doubt, give you a warm embrace, cradling you securely in his arms.

So, little David-lover, what should you do when David gives you a long, serious and meaningful kiss? The first thing, though it might sound obvious, is to *relax*. Nobody likes to kiss a brick wall, which is exactly what your mouth will feel like if you tense up when David gives you that first, big, important kiss. If it helps you to relax, think about the feel of David's lips against yours while you are kissing him. And, don't be afraid to respond to David's kiss—you can, you know, kiss him back!

### Why

David, like all honest people, only kisses a girl he cares about. So, a kiss from David is a very special thing—it means David is very fond of you. Although David is always being asked by fans who meet him for the first time "Can I kiss you?" (to which he almost always says yes!) he doesn't often initiate kissing a fan. He has to really get to know and like you, and want to be with you, because a kiss means a lot to him. It's not something he gives away to just anyone. And, he doesn't kiss girls who just want to be kissed by him because he's David Cassidy—he has to feel that *you*, too, like him very, very much and that he means a lot to you.

While it might seem strange to you, David suffers (just a tiny bit!) from being over-kissed. But if *you* want to win David's heart, don't go after him with a kiss-as-ultimate-goal in your mind; if you *wait* for David to kiss you, those kisses just might last a lifetime through!
