

STARS IN MY EYES!

by **NANCY HARDWICK** Editor, STAR Magazine

Hi STARLuv!

Good enough to eat? Ask David Cassidy! Delightful David read our first issue cover to cover and his fave story was "The Great Kiss Debate!"

He's promised to join in on more of those super rap sessions! (see "Seven Sexiest Kissers," page 12 of this issue!). And he said that he's waiting for us to do one on "Going Steady"—he has a lot on his mind about that!

VISIT DAVID'S NEW HOME!

So many STARLuvs have written asking for news about David's brand new house cause you've heard him talk about it on the STAR Hotline...Well, come along with me on a STAR Magic Exclusive Tour of David's new house in Encino!

As you pull into the long, secluded driveway, the first thing you notice are the many, beautiful shade trees that line it. David's Spanish-style ranch house is on several acres of land with many trees, just like a

park! In back of David's house, along with his pool, is an orchard with pear, peach and plum trees! There is lots of room for his dogs *Willie* and *Sheesh* to run and play! The one-story house has bright red tiles on the roof and white stucco walls. David's house also has a recording studio built right in! He often uses it for practice sessions.

David's bedroom is at the back of the house in a suite of three little rooms. You can see the pool from David's bedroom window!

The living room has a nice big fireplace for those cold winter evenings...and there's a pretty window seat by the big picture windows. Because David had just moved in, most of his furniture and things were still in boxes when he took us through. He just didn't have a chance to unpack yet!

CATCHIN' UP WITH THE OSMONDS

Following the Osmonds around town is like trying to hold onto the tail of a comet! In one week, I followed them from a Glen Campbell show taping to an MGM recording session to a rehearsal for their Florida tour! And while I was just catching my breath, Donny was still one step ahead...he hopped over to Dick Clark's to tape a TV Special called "The Real World of Make Believe!" Watch for it real soon.

OSMONDS NEW ALBUM!

Have you checked out the Osmonds' brand new album entitled *Phase III*? It's the first Osmond album in which the "O" Brothers have written and produced their own songs! Most of the material was written by Alan, Wayne and Merrill... Alan co-produced the album.

At a STAR Mag photo session one day Donny surprised us by pulling out his Gold Record from MGM for "Go Away Little Girl," which he was just awarded that same day!

On March 2 (Jay's Birthday! He'll be 17!), all the Las Vegas STAR Luvs will have a treat in store. The Osmonds will open at Ceasar's Palace and will be in their town for two whole weeks! They'll be staying right there at the Ceasar's Palace Hotel. So if you are brave enough and daring enough (or completely love-flipped over Donny!) keep a watchful eye out at the Ceasar's Palace pool cause that's where adorable Donny and Jivey Jimmy will be staying and playing! And don't let those security guards scare you...Donny loves to sign autographs (but he's kinda shy about kissin').

Rap on New Records

Have you listened to **Paul McCartney's** newest lp "Wildlife?" It features his new group **Wings** and includes his wife Linda...*"Living"* by **Judy Collins** is another lp straight from her heart. Check it out...And all of **Dory Previn's** lps are something every girl should listen to!...Also catch **Carole King's** "Music," and **Mary Hopkin's** "Earthsong." Two ladies with a lot of style!...If you're into heavy groups, turn onto "E Pluribus Funk" from **Grand Funk** and "Killer" from **Alice Cooper**.
