questions

Q. I love David Cassidy, but was wondering if he sets the ends of his hair? It always looks like it because it flips up!

A. No, David does NOT set the ends of his hair! It just curls naturally by itself!

Q. I've got Donny Osmond's record "Sweet and Innocent," and so does one of my friends. But I'm confused because each of ours sounds different. Can you explain what happened?

A. What happened is that there are two versions of "Sweet and Innocent!" Donny recorded it twice—once for the album and again for the single, and while they're almost identical, if you listen closely you will find some minor differences!
