

Jay, Jimmy & Donny with the Queen

David & anti-smoking message

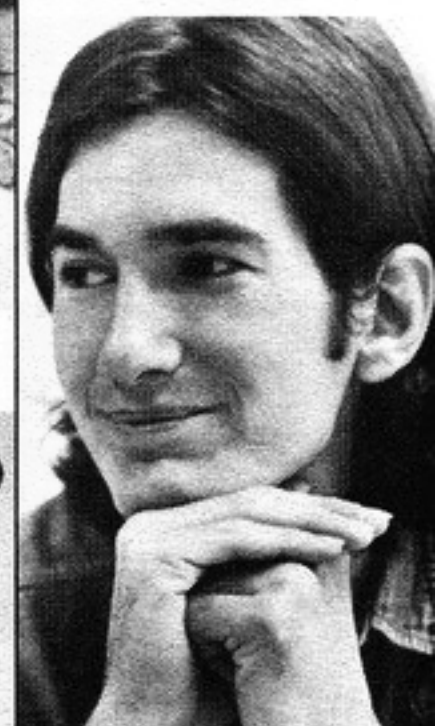

Jack Wild

Brendon Boone

Rick Springfield

Townes Van Zandt

Gilbert O'Sullivan

Dennis Coffey

George Frayne

the LO down

OSMONDS IN THE ROYAL COURT!! Among the entertainers requested at England's biannual Royal Command Performance were LIZA MINELLI, ROWAN & MARTIN, LILY TOMLIN—and the OSMOND BROTHERS! Naturally, the fabulous Osbro brought down the house and afterwards the Queen especially requested to meet JIMMY and DONNY. For more on the Osmonds' exciting trip to England, turn to page 42... DAVID CASSIDY is coming up with a lot of changes! Seems he's getting a little bit bored with his super-bubble-gum image and would like to do a concert tour—wearing funky clothes—with the fabulous THREE DOG NIGHT. Stay tuned for more... Meanwhile, in a recent visit to New York City, David stopped long enough to pose for this anti-cigarette smoking pic for the American Cancer Society. Yes, David did smoke once upon a time. Yes, he did quit. Now his advice is, "If you don't smoke, don't start—and if you do smoke, stop." It's a matter of life and breath... CHRIS KNIGHT would like to do an LP, so stand by for more info.

Jumpin' JACK WILD—one of your all-time faves—is cooling his heels in England for a while after finishing the Paramount movie *Pied Piper*. Right now, Jack is busy writing a TV series he hopes to star in—with a cast of regulars. At press time, he was contemplating whether to accept an invitation to do a feature role in an upcoming movie which will star RICHARD BURTON, DANNY KAYE and PETER SELLERS. Pretty good company, n'est ce pas?... Another super-fav, BRENDON BOONE, is back in the movie business—currently shooting a full-length color flick called *Dirty Business*, co-starring STEPHEN BOYD and RAY MILLAND... Other acting faves who are hard at work are former DS-ers—NANCY BARRETT is a regular on NBC-TV's *Doctors* each weekday afternoon at 2:30 (ET); DAVID SELBY is co-starring with BARBARA STREISAND in *Up The Sandbox*, coming your way this fall; and you can see JERRY LACY in the HUMPHREY BOGART role in WOODY ALLEN's *Play It Again, Sam*

in your neighborhood movie house right now.

Romantic-looking rocker RICK SPRINGFIELD has a groovy single out on Capitol Records called *Speak To The Sky*. It was a number-one hit in his homeland, Australia, and it's included in his Capitol LP *Rick Springfield Beginnings*... Far-out—that's what they call one of England's top-selling record artists, Gilbert O'Sullivan. Gilbert, who has a unique style of his own—if you don't believe it, just look at the photo on this page—has a hit single released in America now. It's called *Alone Again*... Naturally and is on the MAM label... Greet tunefully talented TOWNES VAN ZANDT, a cool cat who's been on the music scene for many moons but has remained relatively "undiscovered." You can start your discovery by picking up on his latest and greatest *Poppy LP High, Low And In Between* and give a special ear to the cut *Two Hands*—you'll hear why Townes is a dynamite discovery!

Make way for GEORGE "Commander Cody" FRAYNE, cos he's about to command his way straight into your record collection! This gent's latest Paramount single *Hot Rod Lincoln* is definitely dynamite—as is his groovy LP *Commander Cody And His Lost Planet Airmen*. You'll be lost in admiration for these rockers... Been wonderin' who's behind those dynamite instrumental hit sounds called *Scorpio* and *Taurus*? Well, have a gander at delicious lookin' DENNIS COFFEY—leader of a group called THE DETROIT GUITAR BAND. Dennis and the guys play mean guitars, and you can groove to their beat for hours when you get a copy of their latest Sussex LP *Evolution*—it's rhythmic rocking at its best... Greet big-voiced BEVERLY BREMERS who, for a petite and adorable 20-year-old, can really belt out a tune! *Don't Say You Don't Remember* was her first honey-of-a-hit sound and she's followed that up admirably with her latest Scepter single called *We're Free*. Give a listen and become a brand-new beautiful Bremers convert.

Beverly Bremers
