

Flippin' Out With David!

**How To Make
David Move:**

1. Cut out the whole page — then paste it on construction paper of the same size.
2. Then cut out each picture individually.
3. Staple the pictures in sequence on the top left and right hand corners of each picture. You should have #1 on the bottom, #20 on top.
4. That's it! Now flip the pages and watch David move!
