

**Monkees**" and **"The Partridge Family."** One of the hits of the afternoon was a pettable silver gray Canadian timber wolf, also ecologists **Dennis Weaver** and **Susan Saint James** who had their own booth called **"McCloud and McMillan's Wife"** where they dispensed animal-saving literature and good vibrations.

**BEACH BOY SPLIT:** **Bruce Johnston** of **The Beach Boys** has split from the group to start a threesome called **California** with **Terry Melcher** and **Dean Torrance** (half of those early rockers, **Jan & Dean**). It's rumored that **Carl Wilson** will start another group with his brother-in-law **Billy Hinsche** who has been playing with the **Beach Boys** and was formerly with **Dino, Desi & Billy**. It's further rumored that **Mike Love** and **Al**

lack of good rock music.

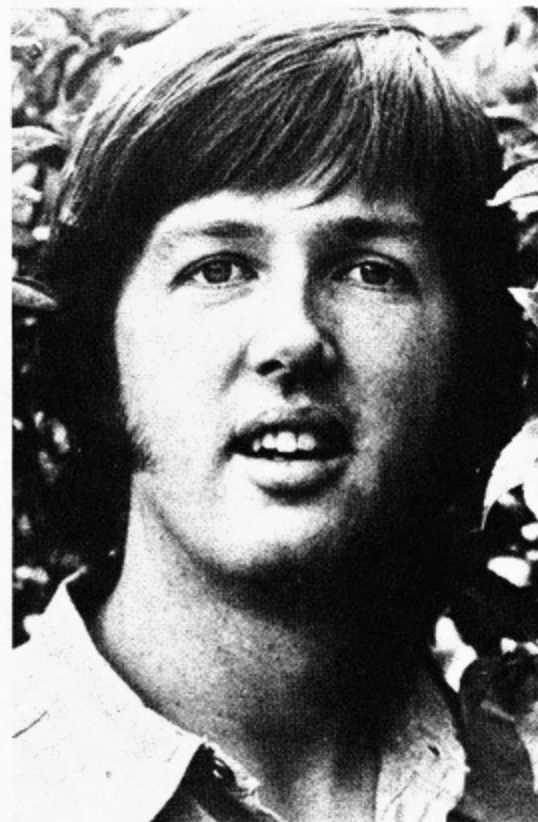

**OLD AND NEW FACES:** Bet you haven't forgotten **Stefan Arnglim**, star of **"Land Of The Giants,"** right? But didja know that he's now involved in all sorts of entertainment pursuits, including movies, television and probably his first love, music. He and his band have just recorded the old **Little Richard** rocker, **"Long Tall Sally,"** and I asked him for a pic so you could see he's gotten a bit long and tall himself. Watch for him in the TV movie **"Silent Night, Lonely Night"** and the flick **"All the Kind Strangers."** This is beside the point, but didja also know that **Stefan's** mom is the voice of **Casper The Friendly Ghost?** Far out!

Now meet, maybe for the first time,

**SHORTIES BUT GOODIES:** **David Cassidy** has bought a home on the Hawaiian island of Maui and is planning a tour in the fall that will take him to New Zealand, Australia, and Japan... There is a lot of ESP between **Andy** and **David Williams**, as there often is with twins, and we must get them to talk about it soon... All American and British pop music has been banned from Cuban radio stations... The group **Bread** has disbanded... **HAWAII O-BOY:** Just spent a fantastic week in Hawaii, digging my first taste of the tropics and visiting the set of **"Hawaii 5-0."** Had a luvely chat with **Jimmy MacArthur** who told me all about something really fantastic. He and two friends spent the winter hiatus from the show driving a Land Rover all the way from London to South Africa! They took no guns on the trip, only cameras, and camped in game refuges along the way. To get there, they had to cross the Sahara Desert, among other things, which in itself is bigger than the U.S. They had a marvelous time, and **Jimmy** looks tanner and thinner than ever. While in Hawaii, I also ran into **Sonny & Cher** who were there to do a concert. My only complaint about the islands is the

**The Allen Family**, four brothers and one sister who are really going places. **Tony, Gary, Ronny, Larry and Mitzi** are already very popular in California because of their many appearances here at Disneyland, Knotts Berry Farm, etc. and they're so good the Hollywood industry papers have tagged them to be the next **Partridge Family!**

**SPRINGFIELD REVIVAL:** That's not only the name of a gear (well, it used to be a word) English group now appearing in concert around the country with the **Osmonds**. It's also what happened when another **Springfield**, namely **Rick**, went back to Australia for a two week visit and record promo trip. He was welcomed with open arms by the press and by his fans. All were delighted to hear that **Rick** will be the subject of still another Saturday mornner here in America, a new animated series called **"Mission: Magic."** **Rick** will do his own voice, plus the music for the show, and will sing at least one song per week!

Sunshine")... **Peter Oliver**, cast-member in London's **"Hair"** and veteran of several British groups will replace **New Seeker Peter Doyle** who's gone off to do his own thing... Someone at the recent rock and roll bowling tournament in Hollywood filled up the bowling ball holes with potato salad!... **Pete Best**, former **Beatle** is playing drums for a top London stage production... **Jan Michael Vincent** is the papa of a baby girl... **Don McLean** summered in Japan, on tour... **Stevie Wonder** is sporting cornrows, those tiny braids that must take forever... 13-year-old **Cheryl Jacobs** says her favorite role so far was on **"Brady Bunch"** and you can expect to see more and more of this Hollywood teen actress... **Michael Cole** is taking a course in self-hypnosis... Hope you didn't miss the sensational tour of the **Electric Light Orchestra** who did that super recording of **"Roll Over Beethoven"**... I'd better roll on til next issue. Love from Hollywood—Janey
