WHAT'S IN THE STARS FOR YOU?!

Here's your personal zodiac report for the coming month! Just look up your sign (according to the day you were born) and find out how the stars will influence your life in the weeks ahead! And no matter what the future holds—may good luck follow you!!!

ARIES (March 21—April 20)—Keep alert this month or golden opportunities will pass you by! Look out for lost money on city streets . . . and don't ignore that friendly fellow in your morning class any longer! He's worth knowing but he won't wait **forever!**

TAURUS (April 21—May 21)—Your will power is unusually strong. Now you can go on that diet or break that bad habit you've been meaning to work on. Don't be afraid to give careful advice to a close friend this month. She needs to hear it and you're able to give it now!

GEMINI (May 22—June 21)—Don't start a lot of big projects this month. Early enthusiasm will fade and you'll be left with half of a painting, half of a hooked rug . . . etc. Get those pesky **little** jobs out of the way instead!

CANCER (June 22—July 23)—Write instructions, directions, important information down. You tend to be forgetful this month! That fellow you're so preoccupied with is too self-centered to give you the attention you need—look elsewhere pronto! There's a handsome Pisces waiting for you in that sea of faces!

LEO (July 24—August 23)—A freckled Cancerian will cheer you this month if you give him a chance! He has some fantastic ideas for those rainy days and you'll soon be wanting to see him when the sun is shining, too!

VIRGO (August 24—September 23)—If you're not feeling up to par, why not review your daily routine? Get a new hobby if things seem dull, dull, dull! And get yourself into shape quickly, because you'll need all your energy for a blue-eyed stranger who's going to pop into your life around the 20th.

LIBRA (September 24—October 23)—You're not saving your money enough! You'll really feel hung up when that special someone's birthday comes around unless you can **make** him something yourself! Use your head and it will be the best gift he's ever received!

SCORPIO (October 24—November 21)—Concentrate this month on the good things you've got! You're luckier than you think and this month can be really rewarding if you add up your pluses!

SAGITTARIUS (November 22—December 21)—You're really going places this month! It's time to travel and you'll have a wonderful time wherever you go! Meanwhile, you're a bit accident prone—so watch it!

CAPRICORN (December 22—January 20)—Try to give in now and then! There's more than one way to do a thing and it's important that you see the other side of things! Someone who will turn out to be very important is trying to help you!

AQUARIUS (January 21—February 19)—You think you've got all the energy in the world—but look out! If you don't stop to think about things you may make a wrong move. You're going to shine in school this month; share that wealth of knowledge with a shy redhead.

PISCES (February 20—March 20)—Don't be influenced by what other people say this month! Actions speak louder than words! If he sees you've got the right attitudes, you'll make points with him!
