

DAVID CASSIDY WANTS NEW IMAGE

David Cassidy said recently he would like to forget such early '70s pop hits as "I Think I Love You." He said he hopes listeners will see his serious side with his new album, "David Cassidy."

Cassidy still has the long, shaggy hairdo of Keith Partridge — plus a few gray hairs. He is the former star of television's "The Partridge Family."

"I was really naive enough to think people wouldn't assume the music I was playing on the show and that light, fluffy sort of airhead character was really me," he said.

In the past, Cassidy has tried to do albums by himself. But the albums did not sell well. Cassidy has stopped writing songs and acting in television shows. In the past he has raised racehorses and worked in theatre. Now he is trying again to shed his old teeny-bopper image with his new album
